

HOW WE CREATE 3D FLOORPLANS

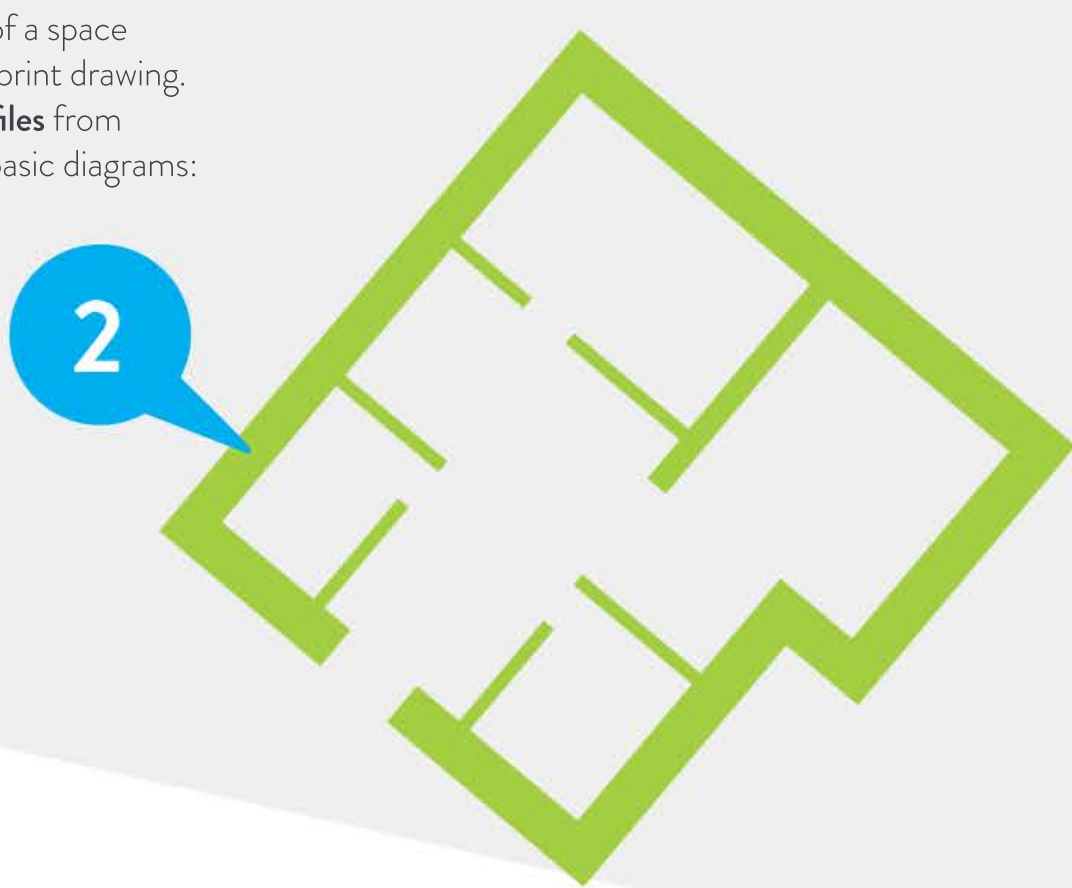

We create photorealistic 3D Floor Plans from assets provided by clients. **No Photo Shoots or Site Visits** required.

BLUEPRINTS OR DRAWINGS

To understand the layout of a space we need a diagram or blueprint drawing. We work with **any source files** from architectural drawings to basic diagrams:

- ✓ CAD
- ✓ PDFs
- ✓ Blueprints
- ✓ Diagrams
- ✓ Drawings

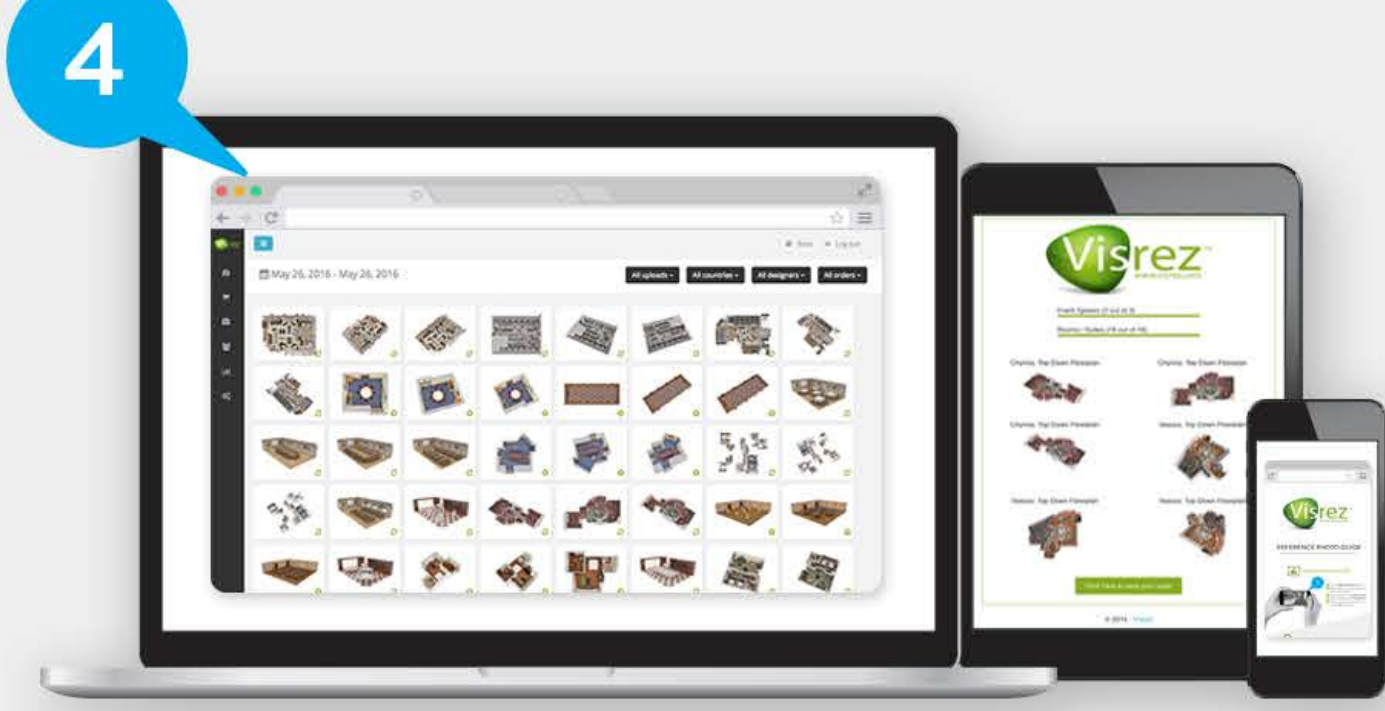

REFERENCE PHOTOS

Reference Photos give us an understanding of each space. These are taken by a staff member with a phone and uploaded to the order. More information is available in the reference guides in your account.

-  BEDROOMS
-  BALLROOMS
-  MEETING ROOMS

PRODUCTION PROCESS

When assets are received your order goes into production and previews are ready within **three to four days**. Our platform allows you to track the progress of your order from start to finish.

REVIEW AND APPROVE

Floorplans can be reviewed with a zoom tool and revisions marked **directly onto the plans** with a pin tool. This ensures that every single detail is correct in the plans.

DOWNLOAD & DISTRIBUTE

Once you are happy with the results your **3D Floorplans** can be downloaded in **high or medium resolution** from the system.
